October 5, 2015

As of December 2011 when our company left the property at 2111 Hayes Ave. Fremont, Ohio. The only remaining drums of fluid that was left on the property were used motor oil and used antifreeze. The used oil was burned in the oil burner on location and oil was stored during the summer months as needed for the winter. Used antifreeze was recycled for used again.

In 2011 the EPA was on location for an inspections and found that we had no violations for fluids at that time.

Best Regards,
